A Unique ID by the public water system for each service line.		Water systems must track addresses of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and galvanized requiring replacement. If the system does not use addresses for their location identifier, other options could include GPS coordinates, landmark, intersection, block, or other details to specify service line locations.											If "Non-Lead Other", describe in Comments field	Important for determining if service line requires replacement	Estimated date when the service line was installed or replaced	Drinking, Non-Drinking, Combination	Diameter in inches	Length in Feet	If "Non-Lead Other", describe in Comments field
